SwapZone: Empowering Fashion Enthusiasts to Buy and Sell Clothes

SwapZone is a comprehensive platform created to offer sellers a way to sell cloth as well as customers a smooth shopping experience, allowing them to browse, search, sell and buy clothes. A user-friendly interface and simple navigation are provided, ensuring easy access to a large selection of goods across numerous categories.

At SwapZone, the central concept revolves around selling their stitched as well as un stitched one to user. A seller is allowed to buy as well as sell through the same platform. A seller is given credit points and if they got any complaints from more people, he will be restricted from selling more.

Functionalities of Module (Mini Project)

1. User Module:

User login and registration, profile creation and management, and preference customization are among the application's primary features.

- Registration and Login
- Searching for products
- Cart management
- Wishlist
- Order Management
